List of Certificate/ Add-on Programs

Academic Year: 2021-22

S.No	Name of the Program	Duration of course	No. of Participants
1	A Two-week certificate program on Lyophilizers	15 days	24
2	A Two-week certificate program on Inventory Management	15 days	30
3	A Two-week certificate program on Computer Aided Drug Designing for Targeted Drug Delivery System	15 days	25
4	A Two-week certificate program on Pharmacovigilance	15 days	29
5	A Two-week certificate program on Scope of pharmacy	15 days	30
6	A Two-week certificate program on Nano Robots and It's Application in Medicine	15 days	98
7	A Two-week certificate program on Community Pharmacist	15 days	100
8	A Two-week certificate program on Adverse Drug Event Reporting	15 days	100
9	A Two-week certificate program on Theoretical Pharmacology	15 days	100

About the Institute

Nimra College of Pharmacy (NCP) is situated just 17 KM from Vijayawada on the main NH 09 Vijayawada-Hyderabad Highway.

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacist and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

Objective of the Programme:-

- The paper reports on the development of a numerical model for the simulation of a lyophilization process in a vial.
- The problems of lyophilization modeling of a mannitol water solution are covered in detail.

This program importance is mainly lyophilisation is a drying process for preservation of sensitive pharmaceutical products. This process is conducted over a range of sub ambient to elevated temperatures and a range of sub atmospheric pressures. The three principal parts of the process—freezing, primary drying, and secondary drying—are conducted at different combinations of these temperatures and pressures. Freezing occurs at temperatures as low as -55°C and at or near 1 atmosphere. Primary drying is conducted at both low temperatures and low pressures. Secondary drying is completed at ambient or warmer temperatures and, by convention, low pressures. These varied conditions present unusual challenges in ensuring proper calibration.

In principle, the lyophilisation process is driven by the environmental conditions created by the lyophilisation equipment. Through the use of a circulating heat-transfer fluid, the product shelves function as heat exchangers, where transfer of heat from the product during freezing and to the product during drying is accomplished by controlling the shelf temperature.

Syllabus

- Eye Anatomy and Disorders
- Cornea External
- Eye Disease
- Eye Injuries / Ocular Trauma Eye Movements,
- Strabismus, Amblyopia and Neuro-ophthalmology
- Glaucoma Lens
- Low Vision

PROGRAM REPORT

Name of the event: A two week certificate program on Lyophilizers.

Date: 30.05.22 to 15.06.22

Resource person: Mr. Anil Kumar

Assistant professor, Nimra College of pharmacy

Email id: phanindrabannaravuri@gmail.com

Contact number: 9951705270

Name of the coordinator: Mr. Md. Yunoos

Number of students attended: 27

Objective of the program:

- This program importance is mainly lyophilisation is a drying process for preservation of sensitive pharmaceutical products. This process is conducted over a range of sub ambient to elevated temperatures and a range of sub atmospheric pressures. the three principal parts of the process—freezing, primary drying, and secondary drying—are conducted at different combinations of these temperatures and pressures. Freezing occurs at temperatures as low as -55°c and at or near 1 atmosphere. Primary drying is conducted at both low temperatures and low pressures. Secondary drying is completed at ambient or warmer temperatures and, by convention, low pressures. These varied conditions present unusual challenges in ensuring proper calibration.
- In principle, the lyophilisation process is driven by the environmental conditions created by the lyophilisation equipment. Through the use of a circulating heat-transfer fluid, the product shelves function as heat exchangers, where transfer of heat from the product during freezing and to the product during drying is accomplished by controlling the shelf temperature. The shelf temperature is measured and monitored using a resistance temperature detector (resistance temperature detector) in a thermo well immersed in the heat-transfer fluid supplied to the shelves.

Nimra College of Pharmacy

Estd By : Nimra Educational Society (A Muslim Minority Society)
Approved by Pharmacy Council of India (PCI), New Delhi.
Affiliated to JNTU, Kakinada, Permitted by Govt. of A.P.
E-mail : principalncp@yahoo.in Website : www.nimra.in

- The required pressures during the drying phases are achieved by evacuating the atmosphere in the lyophilize to a relatively low pressure, and controlling the pressure to a specific level by introducing an inert gas, such as sterile filtered nitrogen. This electronic pressure sensor is located on the product chamber and condenser vessel. These conditions of temperature and chamber pressure are critical process parameters (i.e., process parameters that directly affect finished product quality).
- The paper reports on the development of a numerical model for the simulation of a lyophilization process in a vial.
- The problems of lyophilization modeling of a mannitol water solution are covered in detail.

Topics Covered:

- Eye Anatomy and Disorders
- Cornea External
- Eye Disease
- Eye Injuries / Ocular Trauma Eye Movements,
- Strabismus, Amblyopia and Neuro-ophthalmology
- Glaucoma Lens
- Low Vision
- Oncology Retina
- Vitreous Disorders

Outcomes of the program:

- The results obtained demonstrated that the infectious activity of Mycobacterium lepraemurium was still evident after two years and five months over of the preservation in vitro by lyophilization, and that this period of maintenance of infectious activity of the bacilli was longer than that of the data reported by Shitama (2) and Lew (3).

Objective of the Programme:-

This program is of mainly regarding

Accurate inventory management is key to running a successful product business. Tracking stock regularly can help avoid stock errors and other problems. The following are the benefits of strong inventory management:

Better Inventory Accuracy: With solid inventory management, you know what's in stock and order only the amount of inventory you need to meet demand. **Reduced Risk of Overselling:** Inventory management helps track what's in stock and what's on backorder, so you don't oversell products. **Cost Savings:** Stock costs money until it sells. Carrying costs include storage handling and transportation fees, insurance and employee salaries. Inventory is also at risk of theft, loss from natural disasters or obsolescence. **Avoiding Stock outs and Excess Stock:** Better planning and management helps a business minimize the number of days, if any, that an item is out of stock and avoid carrying too much inventory. Learn more about solving for stock outs in our Control. **Greater Insights:** With inventory tracking and stock control, you can also easily spot sales trends or track recalled products or expiry dates.

Syllabus

- Economic order quantity.
- Minimum order quantity
- ABC analysis
- Just-in-time inventory management
- Safety stock inventory
- FIFO and LIFO.
- Reorder point formula

E-mail : principalncp@yahoo.in Website : www.nimra.in

- labour costs and speeds order fulfilment .better customer experience: customers that receive what they order on time are more loyal.
- Material Availability.
- Better Level of Customer Service.
- Keeping Wastage and Losses to a Minimum.
- Maintaining Sufficient Stock.
- Cost-Effective Storage.
- Cost Value of Inventories Can Be Reduced.
- Optimizing Product Sales..

Topics Covered:

- Economic order quantity.
- Minimum order quantity
- ABC analysis
- Just-in-time inventory management
- Safety stock inventory
- FIFO and LIFO.
- Reorder point formula

Outcomes of the program:

- An inter professional team approach, consisting of clinicians, mid-level practitioners , nursing, and emergency medical staff, employing good preparation, preoxygenation, and recognizing difficult airway enhances airway management success.
- Changing the plan once the provider recognizes the difficulty is prudent and safe. This decreases the failed intubation rates and improves patient outcomes.
- All the personnel involved should regularly sharpen their skills either in the field or in the simulation lab.
- Proper training of the personnel played a bigger role in improving the success rates of intubation, the decrease in mortality rate than the field of medicine they specialized in.

About the Institute

Nimra College of Pharmacy (NCP) is situated just 17 KM from Vijayawada on the main NH 09 Vijayawada-Hyderabad Highway.

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

Objective of the Programme:-

- The ultimate goal of drug design is the discovery of new chemical entities with desirable pharmacological properties.
- Achieving this goal requires medicinal chemists to explore the chemical space for new molecules, which is proved to be extremely difficult, mainly due to the size and complexity of the chemical space.

This Program is applicable to various designing CADD are assessed as promising techniques concurring to their require, in between all these structure-based sedate plan and legend-based drug plan approaches are known as exceptionally efficient and effective procedures in sedate revelation and development. These both strategies can be applied with atomic docking to virtual screening for lead recognizable proof and optimization. Within the recent times computational apparatuses are broadly utilized in pharmaceutical businesses and investigate ranges to improve viability and viability of drug discovery and advancement pipeline. In this article we deliver an outline of computational approaches, which is innovative prepare of finding novel leads and help within the prepare of medicate disclosure and development inquire about.

Syllabus

- MD simulations.
- Site Identification by Ligand Competitive Saturation (SILCS)
- Database Preparation.
- Docking-based VS.
- SILCS-Pharm.
- Similarity Search.
- Lead Optimization using SAR.

Date: 30.05.2022

PROGRAM REPORT

Name of the event: A two week certificate program on Computer Aided Drug Designing For Targeted Drug Delivery System.

Dates: 06.05.22 to 23.05.22

Resource person: Mrs. SK. Hafeezunnisa

Assistant professor, Nimra College of Pharmacy

Email id: hafeezunnisa342@gmail.com

Contact number: 9493690009

Name of the coordinator: Mrs. Sai. Madhuri

Number of students attended:

Objective of the program:

- This programme is useful in computerized systems for (human and veterinary) pharmaceutical industries, pharmaceutical chemical biologics, biotechnology, Blood products Gas medicinal products, and medical devices used in activities related to compliance with good practices (G XP) activities include:
 - Manufacturing / production (gmp)
 - Clinics (gcp)
 - Laboratory (glp)
 - Good distribution practices (gdp)
 - Storage (gwp)
 - Documentation (gdp)
- Approach to compliance with all types of computer systems, according to national and international regulations
- The ultimate goal of drug design is the discovery of new chemical entities with desirable pharmacological properties.
- Achieving this goal requires medicinal chemists to explore the chemical space for new molecules, which is proved to be extremely difficult, mainly due to the size and complexity of the chemical space.

Nimra College of Pharmacy

Estd By : Nimra Educational Society (A Muslim Minority Society)

Approved by Pharmacy Council of India (PCI), New Delhi.

Affiliated to JNTU, Kakinada, Permitted by Govt. of A.P.

E-mail : principalncp@yahoo.in Website : www.nimra.in

Topics Covered:

- MD simulations.
- Site Identification by Ligand Competitive Saturation (SILCS)
- Database Preparation.
- Docking-based VS.
- SILCS-Pharm.
- Similarity Search.
- Lead Optimization using SAR.

Outcomes of the program:

- CADD is a key component of multidisciplinary approaches that are being used for the development of the drug.
- One of the challenges for pharmaceutical companies is to develop drugs that well suits to patients with better efficacy and no side effects.
- Traditional approaches of drug discovery and development were very complex, time taking, and costly and were also full of risk of failure during clinical trials, but CADD approaches are very precise and efficient

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

Objective of the Programme:-

This program is for the applications of Pharmacovigilance from its establishment till now are a well active and scientific authority. It has been very crucial to face the challenges of the growing range of medicines including vaccines, which sustain the inescapable and uncalculated effects of harm. The possibility of harm can be minimized by practicing PV at clinical, production and the administration levels. This scope of PV has somehow been attained but several challenges restrict the blossoming and development of Pharmacovigilance activities. These challenges are listed below Reporting of ADR- Reporting is the base for detection of ADR, especially in case of new and undiscovered adverse drug events. Despite all excellence of reporting low reporting is one of the barriers to the development of PV. Data mining should be practiced after keeping the fact of low reporting system of different medicine, also signals thus be assessed while acknowledging the chances of faulty positives. Low-income countries have a low rate of reporting when compared to developed countries.

• Awareness- Lack of awareness about PV program among the population, pharmacist and other health care professional is the factor that play role in obstructing PV program in developing countries. It is also the main problem in reporting ADR which is the main step for detection of ADR.

Syllabus

- Case-control study (Retrospective study).
- Prospective study (Cohort study).
- Population statistics.
- Intensive event report.
- The spontaneous report in the case is the population of the single case report.

Should be well-designed, easy to understand, correct and must contain necessary points about patient information and the suspected ADR

- The basic objective of pharmacovigilance is the safe use of drugs, patient safety, and, ultimately, safeguarding public health.
- To achieve this goal, national regulators and international organizations should empower healthcare professionals and the public to report more ADRs

Topics Covered:

- Case-control study (Retrospective study).
- Prospective study (Cohort study).
- Population statistics.
- Intensive event report.
- The spontaneous report in the case is the population of the single case report.

Outcomes of the program:

- Systematic, automated and practical means of screening large datasets.
- Better utilization of the large safety databases maintained by the FDA, the World Health Organization (WHO) and other organizations.

About the Institute

Nimra College of Pharmacy (NCP) is situated just 17 KM from Vijayawada on the main NH 09 Vijayawada-Hyderabad Highway.

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

Objective of the Programme:-

- Community pharmacists are equipped to provide education and counseling to patients to address questions they may have regarding factors such as
 - Administration.
 - Storage.
 - Potential side effects and how to taper medications for acute events.

This program is applicable for Pharmacist related to serving community sector, community pharmacy, also well-known as retail pharmacy, is the most common type of the pharmacy that allows the public access to their medications and the advice about their health. Traditionally known to be as a chemist, it is the healthcare facility which is responsible for the provision of the pharmaceutical service to a specific community group or a region.

Most of the community pharmacies have a commercial store with a combination of the medicinal goods only accessible with a prescription and those with that can be purchased Over-The- Counter (OTC).

Syllabus

- Naloxone.
- Self-Medication.
- Adverse Drug Reaction.
- Hospital Pharmacy.
- Pharmacovigilance.

PROGRAM REPORT

Name of the event: A two week certificate program on Adverse Drug Event Reporting.

Dates: 06.12.2021 to 22.12.2021

Resource person: Mr.D.Ramya

Assistant professor, Nimra College of pharmacy

Email id: dramya3234@gmail.com

Contact number: 9848526341

Name of the coordinator: Mr.G.Ramakrishna.

Number of students attended:

Objective of the program:

- Adverse events are undesirable experiences associated with the use of a medical product.
- In the regulatory setting, adverse events are categorized as *adverse drug events (ADEs)* and, as a subset of ADEs, *adverse drug reactions*

Topics Covered:

- An Identifiable Patient.
- An Identifiable Reporter.
- Product Exposure.
- An Event

Outcomes of the program:

- This program adverse event detection is mainly used in processing reporting, advertising, identification, of detected in situations in which a registry has contact with individual patients this document is not a formal regulatory or legal document; any information or suggestions presented herein do not replace or otherwise interpret federal guidance documents that touch on these subjects. registry sponsors are encouraged to discuss plans for, ae's collection and processing with local health's authorities when planning a registry.
- As seriousness guidance
- Expectedness
- Relatedness

- Coding AE's into a standard nomenclature should be done by trained experts to ensure accuracy and consistency reporters, patients, health care providers and registry personnel should do their best to capture
- As a result of recent safety concerns surrounding widely used drugs, there is an increasing focus on drug safety.
- Timely, complete, and accurate ADE reporting is an essential component of monitoring, and subsequently improving, patient safety.
- The FDA may at times communicate risk information about the drug safety issues that are under review to the HCP as well as to the general public.

About the Institute

Nimra College of Pharmacy (NCP) is situated just 17 KM from Vijayawada on the main NH 09 Vijayawada-Hyderabad Highway.

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

Objective of the Programme:-

- Rationalizing the relation between the activity of a particular drug, as observed experimentally, and its structural features as derived from computer experiments.
- On the basis of the structure of a given organic molecule, the theoretical pharmacologist aims at predicting the biological activity of new drugs that are of the same general type as existing drugs.

This program is basically for importance of pharmacology applications in pharmacy

More specifically, it is the study of the interactions that occur between organisms and chemicals that affect normal or abnormal biochemical function. If substances have medicinal properties, they are considered medicinal products. Subject areas include drug composition and properties, synthesis and drug design, molecular and cellular mechanisms, organ/system mechanisms, signalling/cellular communication, molecular diagnostics, interactions, chemical biology, therapy, medical applications. The two main areas of pharmacology are pharmacodynamics and pharmacokinetics. Pharmacodynamics studies the effects of drugs on biological systems, and pharmacokinetics studies the effects of biological systems on drugs. In general, pharmacodynamics discusses biological receptors and chemicals, and pharmacokinetics discusses Absorption, Distribution, Metabolism and Excretion (ADME) of chemicals from biological systems.

Syllabus

- Computer Graphic.
- Stereo Image.
- Drug design.
- Visual Display unit.
- Molecular Graphic

PROGRAM REPORT

Name of the event: A two week certificate programon Theoretical Pharmacology.

Dates: 21.03.2022 to 07.04.2022

Resource person: Mrs.K.Pavani

Assistant professor, Nimra College of pharmacy

Email id: pavani7876@gmail.com

Contact number: 8965427682

Name of the coordinator: Mrs. Ch.Vidyulatha Chowdary.

Number of students attended:

Objective of the program:

- This program is basically for importance of pharmacology applications in pharmacy More specifically, it is the study of the interactions that occur between organisms and chemicals that affect normal or abnormal biochemical function. if substances have medicinal properties, they are considered medicinal products. Subject areas include drug composition and properties, synthesis and drug design, molecular and cellular mechanisms, organ/system mechanisms, signalling/cellular communication, molecular diagnostics, interactions, chemical biology, therapy, medical applications. the two main areas of pharmacology are pharmaco dynamics and pharmacokinetics. pharmaco dynamics studies the effects of drugs on biological systems, and pharmacokinetics studies the effects of biological systems on drugs. in general, pharmaco dynamics discusses biological receptors and chemicals, and pharmacokinetics discusses absorption, distribution, metabolism and excretion (ADME) of chemicals from biological systems. Pharmacology is not synonymous with pharmacy and the two terms are often confused. Pharmacology, a biomedical science, is involved in the study, discovery, and characterization of chemicals that exhibit biological effects, and the elucidation of cellular and biological functions associated with those chemicals. in contrast, pharmacies, as specialists in medical services, are interested in applying the principles learned from pharmacology to their clinical environment. in both areas, the main difference

between the two is the difference in science-oriented research areas driven by direct patient care, pharmaceutical operations, and pharmacology

- Rationalizing the relation between the activity of a particular drug, as observed experimentally, and its structural features as derived from computer experiments.
- On the basis of the structure of a given organic molecule, the theoretical pharmacologist aims at predicting the biological activity of new drugs that are of the same general type as existing drugs.

Topics Covered:

- Computer Graphic.
- Drug design.
- Molecular Graphic.
- Stereo Image.
- Visual Display unit.

Outcomes of the program:

- Integrative biology/physiology, chemical biology/biological chemistry, pharmacogenetics, experimental medicine and systems biology.
- Look up the definitions of these various areas and an awful lot of it sounds like pharmacology.
- The horizon is definitely expanding and there will also be a need to understand at a molecular level how drugs are working.
