## List of Certificate/ Add-on Programs

Academic Year: 2020-21

S.No	Name of the Program	Duration of course	No. of Participants
1	A Two-week certificate program on Promising Drug in Clinical Development	15 days	28
2	A Two-week certificate program on Artificial Intelligence on Clinical Data	15 days	98
3	A Two-week certificate program on Novel Medical Devices	15 days	92
4	A Two-week certificate program on Duty of Pharmacist	15 days	60
5	A Two-week certificate program on Quick Way of Drug Analysis	15 days	100
6	A Two-week certificate program on Computerised System Validation	15 days	24
7	A Two-week certificate program on Pharma Supply Chain Automation	15 days	6
8	A Two-week certificate program on Auditing and Inspecting Principal Research for GLP Compliance	15 days	25
9	A Two-week certificate program on Positive Pressure Isolators	15 days	29

## About the Institute

Nimra College of Pharmacy (NCP) is situated just 17 KM from Vijayawada on the main NH 09 Vijayawada-Hyderabad Highway.

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

## About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

## Objective of the Programme:-

- They have been important technological advances for the treatment of cardiac arrhythmias (e.g., catheter ablation technology), antiarrhythmic drugs (AADs) remain the cornerstone therapy for the majority of patients with arrhythmias.

- Most of the currently available AADs were coincidental findings and did not result from a systematic development process based on known arrhythmogenic mechanisms and specific targets.

This program is related to with metastatic disease are usually treated with active chemotherapy as first-or second line. Therapy current first line active chemotherapy options include 5- fluorouracil leucovorin and irinotecan and oxaliplatin, leucovorin, levoleucovorin and 5- fluorouracil more recently targeted therapist have become available, including anti-epidermal growth factor receptors (EGFR) agents, such as cetuximab and anti vascular endothelial growth factor (VEGFR) Receptor agents such as bevacizumab patients with incurable disease Receive palliative care.

## Syllabus

we focus on a number of antiarrhythmic targets that have received significant attention recently:

- Atrial-specific  $K^+$ -channels, the late  $Na^+$ -current, the cardiac ryanodine-receptor channel type-2, and the small-conductance  $Ca^{2+}$ -activated  $K^+$ -channel.

## Topics Covered:

- we focus on a number of antiarrhythmic targets that have received significant attention recently:
- Atrial-specific K<sup>+</sup>-channels, the late Na<sup>+</sup>-current, the cardiac ryanodine-receptor channel type-2, and the small-conductance Ca<sup>2+</sup>-activated K<sup>+</sup>-channel
- We highlight for each of these targets available antiarrhythmic agents and the evidence for their antiarrhythmic effect in animal models and early clinical development.

## Outcomes of the program:

- Several compounds modulating these targets have been developed and have shown promising antiarrhythmic effects in preclinical studies.
- All antiarrhythmic drugs have multiple electrophysiological targets and diverse pro- and antiarrhythmic effects and there is a clear unmet clinical need for safer and more effective antiarrhythmic drugs.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

## Objective of the Programme:-

- The primary aim of health-related AI applications is to analyze relationships between clinical techniques and patient outcomes.

- AI programs are applied to practices such as diagnostics, treatment protocol development, drug development, personalized medicine, and patient monitoring and care.

This program provides a variety of patient care and intelligence health systems. Artificial Intelligence techniques ranging from machine learning to deep learning are prevalent in health care for disease diagnosis. Drug discovery and Patient risk identification. Numerous medical data sources are required to perfectly diagnose disease using Artificial Intelligence Techniques such as ultra sound magnetic resonance imaging , mammography genomics computed tomography scan, further more artificial intelligence primary enhanced the experience and speed up preparing patients to continue their rehabilitation at the comprehensive survey based on artificial intelligence techniques to diagnose numerous diseases such as Alzimers Cancer Diabetics chronic heart disease TB Stroke

## Syllabus

- AI is able to analyze large amounts of data stored by healthcare organizations in the form of images
- clinical research trials
- medical claims
- and can identify patterns and insights often undetectable by manual human skill sets

## PROGRAM REPORT

**Name of the event:** A two week certificate program on Artificial Intelligence on Clinical Data.

**Date:** 03.03.2021 to 20.03.2021

**Resource person: Mr. T. Sesa Sai Ram**

Assistant professor, Nimra College of pharmacy

Email id: sesharam345@gmail.com

Contact number: 9063459952

**Name of the coordinator: Mr. KAnirudh prasad**

**Number of students attended:**

**Objective of the program:**

- This program provides a variety of patient care and intelligence health systems. Artificial intelligence techniques ranging from mission learning to deep learning are prevalent in health care for disease diagnosis. Drug discovery and patient risk identification. Numerous medical data sources are required to perfectly diagnose disease using artificial intelligence techniques such as ultra sound magnetic resonance imaging , mammography genomics computed tomography scan, further more artificial intelligence primary enhanced
- The experience and speed up preparing patients to continue their rehabilitation at the comprehensive survey based on artificial intelligence techniques to diagnose numerous diseases such as alzimers cancer diabetics chronic heart disease tb stroke .
- The primary aim of health-related AI applications is to analyze relationships between clinical techniques and patient outcomes.
- AI programs are applied to practices such as diagnostics, treatment protocol development, drug development, personalized medicine, and patient monitoring and care.

---

## Topics Covered:

- AI is able to analyze large amounts of data stored by healthcare organizations in the form of images
- clinical research trials
- medical claims
- and can identify patterns and insights often undetectable by manual human skill sets

## Outcomes of the program:

- AI can identify suitable cohorts for clinical trials by analyzing medical records and social media content.
- Trial recruitment can be sped up by using AI technologies to alert medical staff and patients about trial opportunities, as well as simplifying entry criteria to be more accessible for potential participants.

## About the Institute

Nimra College of Pharmacy (NCP) is situated just 17 KM from Vijayawada on the main NH 09 Vijayawada-Hyderabad Highway.

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

## About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

## Objective of the Programme:-

- To provide easy, quick and practical guidelines for diagnosis and management of acute symptomatic seizures
- Newly diagnosed and refractory childhood epilepsy to the practicing pediatrician

This program is essential for outcomes (PROs) have complications across the health care ecosystems, from clinical investigations to evaluate the safety and effectiveness of medical devices to clinical care and reimbursement decisions The US Food and Drug Administration's (FDA) centre for Devices and Radiological Health (CDRH) medical device evaluation throughout the total product life cycle, as well as methods for developing and modifying PRO instruments to ensure they are fit for purpose.

## Syllabus

- Neonatal Epileptic seizures
- Epileptic syndromes In Neonates.
- Febrile Seizures.
- Epileptic syndromes Of Infancy.
- Take Home Massage.

E-mail : [principalncp@yahoo.in](mailto:principalncp@yahoo.in) Website : [www.nimra.in](http://www.nimra.in)

## Topics Covered:

- Neonatal Epileptic seizures
- Epileptic syndromes In Neonates.
- Febrile Seizures.
- Epileptic syndromes Of Infancy.
- Take Home Massage.

## Outcomes of the program:

- Neonatal seizures are associated with high morbidity and mortality, but they can be difficult to diagnose because they often present with subtle signs and symptoms.
- Initial management goals in the emergency department include patient stabilization, seizure cessation, and determination of the etiology; identification of life-threatening treatable causes of the seizures should be prioritized.
- Further management depends on the history and physical examination findings, laboratory testing results, and imaging studies.
- This issue reviews common presentations and causes of neonatal seizures, considerations for emergency department management, and the evidence regarding antiepileptic medications for neonates.

## About the Institute

Nimra College of Pharmacy (NCP) is situated just 17 KM from Vijayawada on the main NH 09 Vijayawada-Hyderabad Highway.

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

## About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

## Objective of the Programme:-

- The basic duty of a pharmacist is to check prescriptions from physicians before dispensing the medication to the patients to ensure that the patients don't receive the wrong drugs or take an incorrect dose of medicine. This programme is important and useful since there is a huge opportunity for pharmacist to have a significant impact on reducing health care costs as they have the expertise to detect, resolve and prevent medications errors and medications related problems. The development of clinical pharmacy practice in recent decades as resulted in an increased number of pharmacists working in clinical advanced roles.

Pharmacist provided services in clinical interventions have been shown to reduce the risk of potential adverse drug events and improve patient outcomes, and the majority of published studies show that these pharmacist activities are cost-effective or have a good cost: - benefit ratio. This review demonstrates that pharmacist can contribute to all holistic health care systems

## Syllabus

- Therapeutic Drug Monitoring (TDM)
- Rational drug use.
- Medication outcomes and comparative effectiveness.
- Pharmacoepidemiology.
- Medication Therapy Management.
- Medication outcomes.
- Hematology and Oncology Pharmacists.
- Pharmacogenomics & Pharmacoeconomics.

## PROGRAM REPORT

**Name of the event:** A two week certificate program on Duty of Pharmacist.

**Date:** 23.12.2020 to 09.01.2121

**Resource person:** Mr. CH.Gowthami

Assistant professor, Nimra College of pharmacy

Email id: gowthami876@gmail.com

Contact number: 9325987741

**Name of the coordinator:** Mrs. B.Phanindra

**Number of students attended:**

**Objective of the program:**

- This programme is important and useful since there is a huge opportunity for pharmacist to have a significant impact on reducing health care costs as they have the expertise to detect, resolve and prevent medications errors and medications related problems. The development of clinical pharmacy practice in recent decades as resulted in an increased number of pharmacists working in clinical advanced roles.
- Pharmacist provided services in clinical interventions have been shown to reduce the risk of potential adverse drug events and improve patient outcomes, and the majority of published studies show that these pharmacist activities are cost-effective or have a good cost: - benefit ratio. This review demonstrates that pharmacist can contribute to all holistic health care systems
- The basic duty of a pharmacist is to check prescriptions from physicians before dispensing the medication to the patients to ensure that the patients don't receive the wrong drugs or take an incorrect dose of medicine.

**Topics Covered:**

- Therapeutic Drug Monitoring (TDM)
- Rational drug use.
- Medication outcomes and comparative effectiveness.
- Pharmacoepidemiology.
- Medication Therapy Management.
- Medication outcomes.
- Hematology and Oncology Pharmacists.
- Pharmacogenomics and Pharmacoeconomics.

## Outcomes of the program:

- Outcomes, therefore, are the intended endpoints of care, and occasional unintended effects (e.g., adverse drug reactions) as well.
- The future of pharmacy rests on demonstrating the positive effect of pharmaceutical care on patient outcomes.

## CIRCULAR

Date: 30.11.2020

All the students are here by informed that a **Two week certificate** program on **Quick way of drug Analysis** will be conducted from 01.12.2020 to **17.12.2020**. All interested candidates can enroll their names with Sk.Rabbani Basha Asst.professor, on or before 01.12.2020. The details of the topics and resource person are available in the brochure on the notice board.

Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

## Objective of the Programme:-

- The ultimate purpose of forensic drug collection, preservation, and analysis is to ensure such evidence is legally admissible as evidence in a court of law.
- Quality control and assurance of the analytical process will be discussed.
- It will also describe how to design and develop simple, sensitive and accurate method for routine quality control of specified compound depending on its molecular structure. Quality control and assurance of the analytical process will be discussed.

This program is applicable in drug analysis aspects of identifying Novel drugs assessing their affinity and specificity characterizing their molecular structures and testing their efficiency in vitro and in vivo.

- Nuclear Magnetic Resonance (NMR) spectroscopy is widely used in screening for Novel drug molecules as well as in structural and binding studies. The high costs of NMR equipment's call for acceleration strategies to increase throughput for large-scale drug screening industrial applications in particular, for efficiency tests, the required high throughput put has not been reached. NMR is normally not applied in such assays. Magnetic Resonance Imaging (MRI) allows for in vivo investigations in animal models.

- chromatography
- spectroscopy

## Syllabus

- identifying novel drugs
- assessing their affinity and specificity
- characterizing their molecular structures
- And testing their efficiency in vitro and in vivo.

## PROGRAM REPORT

**Name of the event:** A two week certificate program on Quick Way of Drug Analysis.

**Date:** 01.12.2020 to 17.12.2020

**Resource person:** Mr. K.Rakesh

Assistant professor, Nimra College of pharmacy

Email id: basharabbani123@gmail.com

Contact number: 9925685648

**Name of the coordinator:** Mrs. SK.Rabbani basha

**Number of students attended:**

**Objective of the program:**

- This program is applicable in drug analysis aspects of identifying novel drugs assessing their affinity and specificity characterizing their molecular structures and testing their efficiency in vitro and in vivo.
- Nuclear magnetic resonance (nmr) spectroscopy is widely used in screening for novel drug molecules as well as in structural and binding studies. the high costs of nmr equipment's call for acceleration strategies to increase throughout for large- scale drug screening industrial applications in particular, for efficiency tests, the required high throughout put has not been reached. nmr is normally not applied in such assays. magnetic resonance imaging (mri) allows for in vivo investigations in animal models.
- Chromatography
- Spectroscopy
- Network pharmacological analysis presents scope for exploring traditional knowledge to find solutions for the current problems challenging the drug discovery industry.

---

- The ultimate purpose of forensic drug collection, preservation, and analysis is to ensure such evidence is legally admissible as evidence in a court of law.
- Quality control and assurance of the analytical process will be discussed.
- It will also describe how to design and develop simple, sensitive and accurate method for routine quality control of specified compound depending on its molecular structure. Quality control and assurance of the analytical process will be discussed.

## Topics Covered:

- identifying novel drugs
- assessing their affinity and specificity
- characterizing their molecular structures
- And testing their efficiency in vitro and in vivo.

## Outcomes of the program:

- Identifying Drug Use and Problem Behaviour. One of the hardest goals is also one of the most important, knowing what to look for when you have concerns about someone's drug use.
- Intervention and Detox.
- Drug Therapy and Treatment Completion.
- Work To Avoid Relapse.

## About the Institute

Nimra College of Pharmacy (NCP) is situated just 17 KM from Vijayawada on the main NH 09 Vijayawada-Hyderabad Highway.

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

## About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

## Objective of the Programme:-

- Computer System Validation(CSV) Computer system installed in the corporations are validated to assure that:

- 1. Systems are developed according to quality software engineering principles.

- 2. Systems meet the business needs of their users.

This programme is useful in computerized systems for (human and veterinary) pharmaceutical industries, pharmaceutical chemical biologics, biotechnology, Blood products Gas medicinal products, and medical devices used in activities related to compliance with good practices (GXP) activities include:

1. Manufacturing / production (GMP)

2. Clinics (GCP)

3. Laboratory (GLP)

4. Good distribution practices (GDP)

5. Storage (GWP)

6. Documentation (GDP)

7. Approach to compliance with all types of computer systems, according to national and international regulations

## Syllabus

- Electronic records to be trustworthy, reliable, and generally equivalent to paper records.

- b) records in electronic form that are created, modified, maintained, archived, retrieved, or transmitted,

- c) Electronic signatures to be equivalent to full handwritten signatures, initials, and other general signings, effective on or after August 20, 1997.

- d) Electronic records may be use in lieu (instead) of paper records

- e) Computer systems (including hardware and software)

- 9 Sub part A General provisions

We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

## About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

## Objective of the Programme:-

- Supply-chain optimization (SCO) aims to ensure the optimal operation of a manufacturing and distribution supply chain.
- This includes the optimal placement of inventory within the supply chain, minimizing operating costs including manufacturing costs, transportation costs, and distribution costs.

This program is applicable in more diverse product types and Therapies with shorter lifecycles; new ways for assessing, approving and monitoring medicines increasing emphasis on outcomes; new modes of delivering healthcare where the care is pushed into the community and where access to Information on patients will become as important as the products themselves growing importance of emerging markets a greater public scrutiny impacting the ability to manage risk and compliance, and tougher environmental controls and regulations will oblige companies to strategically reassess their chain approach.

Technologies are emerging to help Pharma Companies manufacturer & wider and more complex range of medicines distribute them and also to speed the interface with the patient.

## Syllabus

- drug development
- including drug screening
- anti-counterfeiting
- Manufacturing tasks.

**Name of the coordinator:** Mr. M.Ramakrishna reddy

**Number of students attended:**

**Objective of the program:**

- This program is applicable in more diverse product types and therapies with shorter lifecycles; new ways for assessing, approving and monitoring medicines increasing emphasis on outcomes; new modes of delivering healthcare where the care is pushed into the community and where access to information on patients will become as important as the products themselves growing importance of emerging markets a greater public scrutiny impacting the ability to manage risk and compliance, and tougher environmental controls and regulations will oblige companies to strategically reassess their chain approach.
- Technologies are emerging to help pharma companies manufacturer & wider and more complex range of medicines distribute them and also to speed the interface with the patient
- Supply-chain optimization (SCO) aims to ensure the optimal operation of a manufacturing and distribution supply chain.
- This includes the optimal placement of inventory within the supply chain, minimizing operating costs including manufacturing costs, transportation costs, and distribution costs.

## Topics Covered:

- drug development
- including drug screening
- anti-counterfeiting
- Manufacturing tasks.
- 

## Outcomes of the program:

- Pharmaceutical industry is increasingly making use of robotics to automate specific processes in drug development, including drug screening, anti-counterfeiting and manufacturing tasks.
- The technique of making an apparatus, a process, or a system operates automatically.
- The creation and application of technology to monitor and control the production and delivery of products and services.”

## About the Institute

Nimra College of Pharmacy (NCP) is situated just 17 KM from Vijayawada on the main NH 09 Vijayawada-Hyderabad Highway.

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Coastal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

## About the Department

Pharmacy is the health profession that links the health sciences with the chemical sciences, and it is charged with ensuring the safe use of medication. The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications on the orders of physicians, and it also includes more modern services related to patient care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are experts on drug therapy and are the primary health professionals who optimize medication use to provide patients with positive health outcomes.

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

## Objective of the Programme:-

- The Principles of GLP define the responsibilities of test facility management, study director, study personnel and quality assurance personnel that are operating within a GLP system.
- Data on safety testing have to be submitted to receiving authorities for marketing authorization of the product
- This program compiled in quality assurance Strategy s for assessing good laboratory practice compliance at different testing facilitates varies from focusing on study date verification to taking a quality system approach. As a best practice and to ensure overall compliance with GLP regulations, the quality Assurance Unit (AU) should perform three types of internal audits serve as a tool to assertion whether a GLP compliance program is functioning correctly, Information gathered from these audits can also be used to provide assistance during the evaluation of a New GLP compliance program. As the GLP compliance program matures, internal Audits' can be a useful mechanism to help maintain compliance and promote continued improvement

## Syllabus

- Test Facility organization and personnel (Sponsor/CRO/Sub-Contractor Responsibilities - Including IT Providers)
- Quality Assurance
- Equipment and computerized systems
- Test items, reference items and samples/specimens (including for Biologicals, GMOs, etc.)
- SOPs
- Management of the study
- Histopathology
- Archives Including E-Archives

- Department of Pharmaceutics.
- Department of Pharmaceutical Analysis.
- Department of Pharmacognosy & Phytochemistry
- Department of Pharmacology.
- Department of Pharmacy Practice.
- Department of Pharmaceutical Chemistry.

## Objective of the Programme:-

- Positive pressure isolator is essential to ensure the containment of product handling in a clean and/or sterile atmosphere.
- The manipulation of sterile materials in such a way as to minimize the risk of microbiological contamination from the environment

This is essential in study of isolators aseptic Contaminant

- Un classified Rom
- Classified Room
- Laminar flow hood
- Barrier System Open pass
- A septic open
- Aseptic Closed
- Aseptic cyto -toxic closed
- cytotoxic closed
- Bio safety Cabinet
- Classified Room/unclassified Rom.

Positive pressure refers to the pressure with the contaminant system being higher than the external pressure. These system protect the process being conduction within the isolator and have many applications within industries where the integrity of the production process.

## Syllabus

- In production sites, an isolator allows the containment of pharmaceutical processes.
- They require a protected environment, free of viable microorganisms.
- The isolator ensures the production area and the personnel/environment are separate.
- Its role is to prevent contamination from one area spreading to the other.

## Topics Covered:

- In production sites, an isolator allows the containment of pharmaceutical processes.
- They require a protected environment, free of viable microorganisms.
- The isolator ensures the production area and the personnel/environment are separate.
- Its role is to prevent contamination from one area spreading to the other.

## Outcomes of the program:

- Positive Pressure Recirculating Isolators are designed to provide a sterile, positive pressure work environment for the compounding of non-hazardous drugs.
- The Positive Pressure Recirculating Isolators create a recirculating positive pressure, ISO Class 5 clean air controlled environment.
- Positive pressure rooms are usually used in scenarios that must continually filter harmful contaminants out of the environment.
- Helpful when treating patients with compromised immune systems because the introduction of any harmful element will be efficiently filtered out.
