## About the Program

Entrepreneurship development is critical for economic growth and development. Entrepreneurs create new businesses, products, and services, which generate employment opportunities and stimulate innovation and competition. Entrepreneurship development also promotes social and economic mobility by providing opportunities for individuals from diverse backgrounds to create wealth and achieve financial independence. In addition, entrepreneurship development can help to address social and environmental challenges, such as poverty, inequality, and climate change. It encourages individuals to identify and pursue new solutions to these challenges, driving social and economic progress. Entrepreneurship development requires a supportive ecosystem that includes access to capital, training and mentorship, and supportive policies and regulations. By investing in entrepreneurship development, governments, businesses, and other stakeholders can foster a culture of innovation and create new opportunities for growth and prosperity.

# About College

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Costal Andhra, since its inception and foundation. NCP has constantly led the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens.

Reflecting the values of education , the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.

## About the Program

A seminar on pharma intellectual property rights in India in 2022 would be a timely event, given the significant changes taking place in this area of law. Attendees would gain insights into the latest developments in Indian patent law, including recent court decisions and legislative changes. The seminar would cover topics such as patentability criteria, compulsory licensing, and patent infringement. Attendees would learn about the different types of patents available in India, including product, process, and use patents, and the requirements for obtaining them. The seminar would also cover trademarks and copyrights in the pharmaceutical industry and the challenges of protecting these types of intellectual property rights. The seminar would be an excellent opportunity for pharma professionals, lawyers, and other stakeholders to gain a deeper understanding of the complex and rapidly changing field of pharma intellectual property rights in India, helping them to develop effective strategies for protecting their intellectual property and staying ahead of the competition.

## About the Program

Research and Development (R&D) is a crucial component of any organization or industry that seeks to innovate and remain competitive in today's rapidly changing world. R&D refers to the systematic exploration, study, and experimentation of new ideas and technologies with the aim of creating new products, services, or processes that can enhance the organization's value proposition or address customer needs better than the competition. The two main components of R&D are research and development. Research involves the discovery and investigation of new knowledge, technologies, or ideas that can be used to create new products, services, or processes. Development, on the other hand, involves the design, testing, and refinement of these new ideas or technologies to create commercially viable products, services, or processes that can be brought to market. Together, research and development enable organizations to remain at the forefront of innovation, ensuring that they continue to meet the evolving needs of customers and remain competitive in the marketplace.

# About the Program

Entrepreneurial creativity is the ability to develop new ideas and solutions to problems. It is the ability to see into the future and generate ideas, solutions and innovations before they are needed. It is the ability to solve your customer's or client's problems before they even realize the problem exists. Creativity, innovation, and entrepreneurship are critical for success in the pharmacy industry. In a rapidly evolving healthcare landscape, pharmacists must be creative and innovative in developing new strategies to improve patient outcomes and meet evolving patient needs. Entrepreneurs in the pharmacy industry are leveraging technological innovations to streamline processes and develop new products and services that enhance patient care. By embracing a culture of creativity and innovation, pharmacists can identify new opportunities for growth and development and stay ahead of the curve in an increasingly competitive marketplace. Entrepreneurs in the pharmacy industry are not only focused on developing new products and services but also on creating new business models that challenge traditional healthcare paradigms.

## About the Program

Entrepreneurship in community pharmacy involves identifying and capitalizing on new opportunities to grow and expand the business. This can involve developing new products or services, expanding into new markets, or improving existing operations. Entrepreneurs in community pharmacy need to have a solid understanding of the local market, including the needs and preferences of their customers and the competitive landscape. They also need to be innovative and creative, willing to take risks and experiment with new approaches. Entrepreneurs in community pharmacy can leverage emerging trends and technologies, such as telepharmacy, medication synchronization, and medication therapy management, to differentiate themselves from competitors and create new value for their customers. Additionally, they can invest in marketing and branding to build their reputation and attract new customers. By embracing entrepreneurship, community pharmacy owners can drive growth and profitability while improving patient outcomes and contributing to the overall health of the community.

## About the Program

Innovation is the specific instrument of entrepreneurship. It is the act that endows resources with a new capacity to create wealth. Changes the wealth producing potential of already existing resources constitutes. Innovation does not have to be technical. A seminar on innovation and entrepreneurship would explore the role of innovation in driving entrepreneurial success. The seminar would provide insights into the latest trends in innovation and highlight strategies for leveraging innovation to create new products and services.

The seminar would explore the different forms of innovation, including product innovation, process innovation, and business model innovation. It would also provide insights into the various sources of innovation, including internal innovation, open innovation, and collaborative innovation.

In addition to exploring the different forms and sources of innovation, the seminar would also provide guidance on how to develop a culture of innovation within an organization. This would include strategies for encouraging creativity, promoting risk-taking, and fostering a mindset of continuous improvement.

# About College

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning. Nimra is strongly identified with most trusted name of Pharmacy education in Costal Andhra, since its inception and foundation. NCP has constantly leaded the way in reform movements, reconstruction, modernization, and administration of the society.

The college provides students with an exceptional education because of the quality of its faculty, staff, student services, curriculum, experiential programs, and the quality of the students themselves.

Over the past years, we have made great strides in quality pharmacy education, providing unique learning opportunities for students and meeting the challenge of industry demands.

We are proud of our significant progress in meeting the goals and objectives of the college's mission to promote the health and welfare of the citizens of the nation.

There is a deep and abiding resolve on the part of all who comprise the College family to actively contribute to the full professional realization of each and every student. We believe that a true grounding as a professional requires a sense of belonging, a sense of caring, and a sense of commitment. In that regard, we are driving by a "spirit of community."

NCP is determined of preparing outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the diverse populations of the state and society and enhancing the delivery of essential pharmacy services for all citizens

Reflecting the values of education, the vision of the Nimra College of Pharmacy is to contribute to the building of a better society for all through improved health status of individuals and the community. We will accomplish this vision through devotion to our mission of increased educational opportunities to society as a whole.

The College will strive to prepare students to be competent, attentive, and ethical professionals dedicated to providing care to patients and supporting the health care team.
