Objective of FDP

- To deliver one or more molecules which has sufficient biological activity.
- To support both basic and translational research.
- To develop innovative technologies.

Outcome of FDP

- To provide insights into novel and recent trends in drug discovery.
- To provide widespread knowledge on research in different areas of pharmaceutical sciences.
- To bring about a healthy enhancement in the academic .

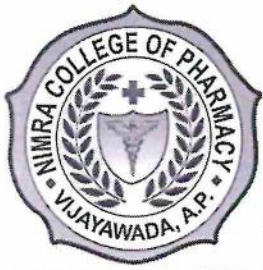

Conclusion : A one week FDP concluded on 24-07-2021 with plenty of learning & experience for the participants who were faculties from different institutions across the Andhra pradesh.

Total no of participants: 27

ABOUT THE TOPIC

Advances in drug discovery and pharmaceutical sciences have the potential to revolutionize the way we develop and deliver drugs to patients.

High-throughput screening: High-throughput screening allows researchers to test large numbers of compounds quickly and efficiently.

Advances in robotics and automation have made it possible to screen hundreds of thousands of compounds in a single experiment, increasing the speed and efficiency of drug discovery.

Gene editing: Gene editing technologies such as CRISPR-Cas9 are being used to identify and validate new drug targets, and to develop new therapies for genetic diseases.

About the Topic

Research methodology and report writing are essential components of any research project. Here are some key considerations for both.

Research question: A clear and focused research question should guide the research project and help to determine the research methodology.

Literature review: A comprehensive literature review should be conducted to identify gaps in knowledge and inform the research design.

Research design: The research design should be appropriate to the research question, and include considerations such as sample size, data collection methods, and statistical analysis.

Data collection: Data collection should be carefully planned and executed to ensure data quality and minimize bias.

Approved by Pharmacy Council of India (PCI), New Delhi.

Affiliated to JNTU, Kakinada, Permitted by Govt. of A.P.

E-mail : principalncp@yahoo.in Website : www.nimra.in

Date:21-12-2021

PROGRAM REPORT

Name of the programme : A one week FDP on NEW TRENDS & CHALLENGES IN TOXICOLOGY STUDIES

Organized by : Department of Pharmacy

Date : 13-12-2021 to 18-12-2021

Resource persons : 1. Dr.A.Narendra Babu
Dept of Pharmacology, Professor
Chalapathi institute of pharmaceutical sciences, Guntur
Cell no: 9849010007
E-mail: narendraankem@rediffmail.com

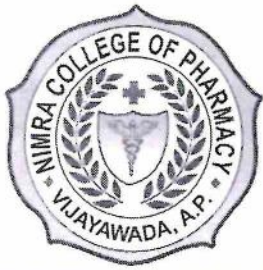

2. Dr. Asif Rasheed
Professor & HOD, Dept of pharmacology
Deccan school of pharmacy, HYD
Cell no: 9030367350
E-mail: asifrasheed707@gmail.com

3. N.Srinivas
Associate Professor, Dept of Pharmacology
AKRG college of pharmacy, Nallajerla
Cell no: 8019189741
E-mail: srnvs87akshi@gmail.com

4. Dr.M.Janarthan
Professor, Dept of pharmacology
Nimra college of pharmacy, Ibrahimpatnam
Cell no: 9989040302
E-mail: principalncp@yahoo.in

5. Dr.P.Veeresh Babu
Professor, Dept of Pharmacology
Gokaraju Rangaraju college of pharmacy, HYD
Cell no: 9493530528
E-mail: pratap.veeresh@gmail.com

6. Dr.S.Mohanraj
Profesor, Dept of pharmacology
SSM college of pharmacy, Erode
Cell no: 9994709756
E-mail: ksmohanraj08@gmail.com

Nimra College of Pharmacy

Estd By : Nimra Educational Society (A Muslim Minority Society)

Approved by Pharmacy Council of India (PCI), New Delhi.

Affiliated to JNTU, Kakinada, Permitted by Govt. of A.P.

E-mail : principalnecp@yahoo.in Website : www.nimra.in

Objective of FDP

- To identify and understand the different types of outdoor pollutants and their toxic effects.
- To understand the toxic effects of various types of metals, pesticides and other chemicals.
- To become familiar with ATSD's ToxFAQs, toxicological profiles and fact sheets.

Outcome of FDP

- To test the hypothesis that as a rule exposure to mixture of chemicals at non-toxic doses of the individual chemicals is of no health concern.
- The goal of toxicology is to contribute to the general knowledge of the harmful actions of chemical substances.
- Toxicology is the study of adverse effects of the chemical or physical agents on living organisms.

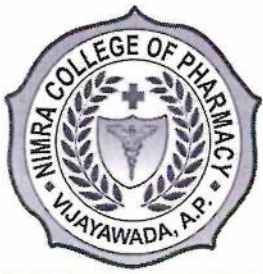

Conclusion : A one week FDP concluded on 18-12-2021 with plenty of learning & experience for the participants who were faculties from different institutions across the Andhra Pradesh.

Total no of participants: 27

NIMRA COLLEGE OF PHARMACY

About the Topic

Toxicology is the study of the harmful effects of chemical, physical, or biological agents on living organisms. As new substances are introduced into the environment and existing substances are used in new ways, toxicology faces new challenges. Some of the new trends and challenges in toxicology studies include:

Nanotoxicology: With the increasing use of nanomaterials in various industries, it has become essential to understand their toxicological effects. Nanoparticles have unique physicochemical properties that can make them more toxic than their bulk counterparts. Nanotoxicology aims to investigate the potential toxicity of nanoparticles and to develop strategies to minimize their adverse effects.

Omics technologies: The development of omics technologies, such as genomics, transcriptomics, proteomics, and metabolomics, has revolutionized toxicology. These technologies allow researchers to study the molecular mechanisms underlying toxicity and to identify biomarkers of exposure and effect.

About College

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning, Nimra is strongly identified with most trusted name of Pharmacy education in Costal Andhra, since its inception and foundation. NCP has constantly leaded the way in reform movements, reconstruction, modernization, and administration of the society.

Objective of FDP

- To design a quality product and its manufacturing process to consistently deliver the intended performance of the product.
- To promote high standards in pharmaceutical product production.
- Many pharmaceuticals do directly cure conditions, they can also be used to manage pain, symptoms or side-effects of other treatments, helping to relieve discomfort.

Outcome of FDP

- The industry contributes directly to world GDP and supports a high number of employees.
- New operating models will bring much needed innovation.
- Digital tools will improve patient outcomes.

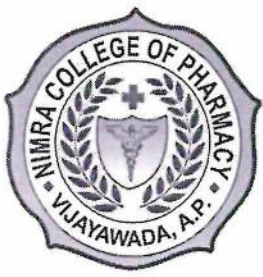

Conclusion : A one week FDP concluded on 19-02-2022 with plenty of learning & experience for the participants who were faculties from different institutions across the Andhra Pradesh.

NIMRA COLLEGE OF PHARMACY

**Nimra Nagar, Jupudi,
Ibrahimpattam-521456.**

About the Topic

There are several current trends in pharmaceutical products and development, and regulatory aspects play a crucial role in shaping these trends. Here are some examples:

Personalized Medicine: Personalized medicine is an emerging trend that tailors medical treatment to an individual genetic makeup, lifestyle, and other factors. This involves the development of targeted therapies, which are designed to treat specific molecular targets, rather than treating the disease as a whole. Regulatory aspects play a key role in evaluating the safety and efficacy of these therapies and ensuring that they are appropriate for use in specific patient populations.

Biologics: Biologics are complex molecules derived from living organisms, and they represent a growing segment of the pharmaceutical market. These products pose unique regulatory challenges, as they are difficult to manufacture and require specialized testing and evaluation. Regulatory agencies are working to establish guidelines for the development and evaluation of biologics to ensure their safety and efficacy.

About the Topic

Nanoparticles for Targeted Drug Delivery: Nanoparticles can be engineered to deliver drugs to specific cells or tissues in the body, which can improve drug efficacy while minimizing side effects.

Liposomes for Drug Delivery: Liposomes are spherical structures composed of phospholipids that can be used to encapsulate drugs. They are particularly useful for delivering hydrophobic drugs and can be modified to target specific cells or tissues.

Dendrimers for Drug Delivery: Dendrimers are highly branched, nano-sized molecules that can be used to encapsulate drugs. They have a high surface area-to volume ratio, which allows for high drug loading, and can be modified to target specific cells or tissues.

Safety Concerns: One of the major challenges associated with nano drug delivery systems is ensuring their safety. Nanoparticles can interact with biological systems in unexpected ways, leading to toxicity or other adverse effects.

NANO DRUG DELIVERY SYSTEM INNOVATIONS, CHALLENGES & OPPORTUNITIES

Approved by Pharmacy Council of India (PCI), New Delhi.

Affiliated to JNTU, Kakinada, Permitted by Govt. of A.P.

E-mail : principalncp@yahoo.in Website : www.nimra.in

Objective of FDP

- To optimise and improve patient's and public health
- Involves compounding and manufacturing of medicines.
- Pharmacy education benefits the profession and the society.

Outcome of FDP

- Assistance and guidance on all aspects of basic and advances in pharmacy practice research.
- Enhancing pharmacists involvement in the education of patients on drug use.
- Good pharmacy practice facilitate regulatory pharmaceutical care to patients.

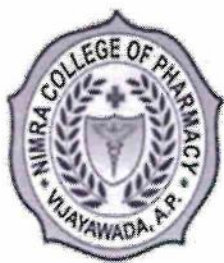

Conclusion : A one week FDP concluded on 16-07-2022 with plenty of learning & experience for the participants who were faculties from different institutions across the Andhra pradesh.

Total no of participants: 25

NIMRA COLLEGE OF PHARMACY

Nimra Nagar, Jupudi,
Ibrahimpattanam-521456.

About the Topic

Increased Emphasis on Clinical Skills: Pharmacy education has evolved to place more emphasis on clinical skills, such as patient counseling, drug therapy management, and medication therapy management. This has led to more experiential learning opportunities, such as internships and clinical rotations, to give students real-world experience in these areas.

Integration of Technology: The use of technology in pharmacy practice has become increasingly prevalent in recent years. For example, electronic health records (EHRs) have become standard in many healthcare settings, allowing pharmacists to access patient information more quickly and easily. Additionally, there has been a rise in telepharmacy services, which use videoconferencing and other technologies to provide remote pharmacy services to patients in rural or underserved areas.

Personalized Medicine: Personalized medicine is an emerging field that tailors medical treatment to an individual genetic makeup, lifestyle, and other factors. Pharmacists are playing an important role in this field by providing medication therapy management services and advising on medication selection based on a patient's unique characteristics.

Objective of FDP

- A little care and adherence to prescribed safety guidelines will help avoid laboratory mishaps.
- These skills play a significant role in order to perform various experiments and to run various tests.
- They guide lab personnel to deliver their assigned duties within limited time and resources.

Outcome of FDP

- They will acquire knowledge about maintenance and safety.
- Helps to prevent or eliminate the hazards
- These techniques are vital for most of the experiments.
