PROGRAM REPORT

Name of the programme : A one week FDP on EXPLORING NEW HORIZONS IN PHARMACOLOGY DRUG DISCOVERY & DEVELOPMENT

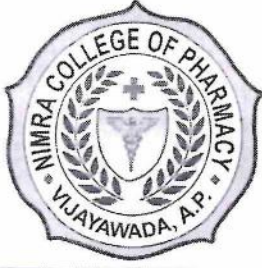

Organized by : Department of Pharmacy

Date : 19-10-2020 to 24-10-2020

- Resource persons :
1. Dr.P.Veeresh Babu
Professor, Dept of Pharmacology
Gokaraju Rangaraju college of pharmacy, HYD
Cell no: 9493530528
E-mail: pratap.veeresh@gmail.com
 2. Ch.Nagabhushanam
Assistant Professor, Dept of pharmacology
KVSr Siddhartha college of pharmaceutical sciences, Vij
Cell no: 9951067030
E-mail: chnb137@gmail.com
 3. Dr. Asif Rasheed
Professor & HOD, Dept of pharmacology
Deccan school of pharmacy, HYD
Cell no: 9030367350
E-mail: asifrasheed707@gmail.com
 4. Dr.A.Narendra Babu
Dept of Pharmacology, Professor
Chalapathi institute of pharmaceutical sciences, Guntur
Cell no: 9849010007

 5. N.Srinivas
Associate Professor, Dept of Pharmacology
AKRG college of pharmacy, Nallajerla
Cell no: 8019189741
E-mail: srnvs87akshi@gmail.com

Objective of FDP

- To understand the health conditions alluring treatment of previously untreatable conditions.
- The main concept is to turn a idea into product.
- To provide an understanding of medications ,their sources, chemical properties & therapeutic uses.

Nimra College of Pharmacy

Estd By : Nimra Educational Society (A Muslim Minority Society)

Approved by Pharmacy Council of India (PCI), New Delhi.

Affiliated to JNTU, Kakinada, Permitted by Govt. of A.P.

E-mail : principalncp@yahoo.in Website : www.nimra.in

Outcome of FDP

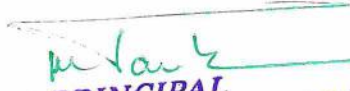

- To bring about a healthy enhancement in the academic .
- To get in depth understanding reaserch and its implications .
- To disseminate teaching skills .

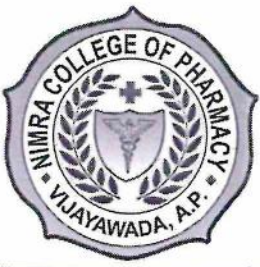

Conclusion : A one week FDP concluded on 24-10-2020 with plenty of learning & experience for the participants who were faculties from different institutions across the Andhra pradesh.

Total no of participants: 26

About The Topic

Pharmacology drug discovery and development are constantly exploring new horizons to improve the treatment of diseases. Here are some of the recent advancements and areas of focus Personalized medicine: Personalized medicine involves tailoring treatments to an individual genetic makeup, lifestyle, and environment. Advances in genomics and molecular biology are enabling the development of personalized treatments for diseases such as cancer and rare genetic disorders. Artificial intelligence and machine learning: Artificial intelligence and machine learning are being used to analyze large amounts of data and identify potential drug candidates. These technologies are also being used to optimize drug dosing and predict adverse drug reactions. Targeted therapies: Targeted therapies are designed to target specific molecules or pathways involved in the disease process. These therapies can improve treatment outcomes and reduce side effects compared to traditional treatments. Immunotherapy: Immunotherapy involves using the body's own immune system to fight cancer and other diseases. Advances in immunotherapy include the development of checkpoint inhibitors, CAR-T cell therapy, and cancer vaccines.

About College

Nimra College of Pharmacy a self-finance institution established by Nimra Educational Society in the year 2006 with a view of providing Pharmacy education within a modern educational environment and strong academic planning. Nimra is strongly identified with most trusted name of Pharmacy education in Costal Andhra, since its inception and foundation. NCP has constantly leaded the way in reform movements, reconstruction, modernization, and administration of the society.

About the Topic

An integrated approach to natural resources in drug development and discovery involves leveraging the knowledge of traditional medicine and natural products to identify new drug candidates. Here are some ways in which an integrated approach can be applied

Ethnobotany: Ethnobotany is the study of traditional plant use by indigenous people. This knowledge can be used to identify plants with potential medicinal properties. The active compounds in these plants can then be isolated and tested for their pharmacological activity.

Bioprospecting: Bioprospecting involves searching for new drug candidates in natural resources, such as plants, marine organisms, and microorganisms. These resources can be screened for potential therapeutic activity, and the active compounds can be isolated and tested.

K V S R Siddhartha collage of pharmaceutical sciences
Cell no: 9441902645
E-mail: tprao2020@gmail.com
 4. P. Bhargav bhusan rao
Associate Professor, Dept of pharmaceutics
V.V Institute of pharmaceutical sciences , Gudlavalleru
Cell no:9850950950
E-mail: bharghav5mpfarm@yahoo.co.in
 5. DR.S.M.Shahidulla
Professor & HOD, Dept of pharmaceutics
Deccan school of pharmacy, HYD
CELL NO:9963982707
E-mail : S.shahidulla@gmail.com

Objective of FDP

- To optimize regenerative techniques.
- To make the required amount of drug available at it's desired site of action.
- Aims to extend, localize,target& have a safe drug interaction with the diseased tissue.

Nimra College of Pharmacy

Estd By : Nimra Educational Society (A Muslim Minority Society)

Approved by Pharmacy Council of India (PCI), New Delhi.

Affiliated to JNTU, Kakinada, Permitted by Govt. of A.P.

E-mail : principalncp@yahoo.in Website : www.nimra.in

Outcome of FDP

- To bring about a healthy enhancement in the academic .
- To get in depth understanding reaserch and its implications .
- To disseminate teaching skills .

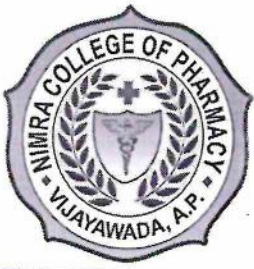

Conclusion : A one week FDP concluded on 20-02-2021 with plenty of learning & experience for the participants who were faculties from different institutions across the Andhra Pradesh.

Total no of participants: 26

Venue:

Seminar Hall

NIMRA COLLEGE OF PHARMACY
Nimra Nagar, Jupudi,
Ibrahimpattanam-521456.

ABOUT THE TOPIC

Recent trends in drug delivery and targeted drug delivery systems include the development of new technologies and approaches to improve drug efficacy, reduce side effects, and enhance patient outcomes. Here are some of the key trends

Nanoparticles: Nanoparticles are being used as drug delivery vehicles to improve the delivery of drugs to specific cells or tissues. These particles can be engineered to have a long circulation time, to be biocompatible, and to release drugs in a controlled manner, allowing for sustained therapeutic effects.

Liposomes: Liposomes are hollow spheres made of lipids that can encapsulate drugs. They are being used to improve the delivery of drugs that are poorly soluble or unstable in the bloodstream. Liposomes can also be engineered to target specific cells or tissues.

Objective of FDP

- The safe use of drugs, patient safety and ultimately safeguarding public health.
- To ensure the rigorous testing of clinical drugs to improve patient care and reduce the risk of negative side effects.
- To promote the safe and effective use of health products.

Nimra College of Pharmacy

Estd By : Nimra Educational Society (A Muslim Minority Society)

Approved by Pharmacy Council of India (PCI), New Delhi.

Affiliated to JNTU, Kakinada, Permitted by Govt. of A.P.

E-mail : principalncp@yahoo.in Website : www.nimra.in

Outcome of FDP

- Safety pharmacology or pharmacovigilance, is a critical pre-clinical step in the drug development.
- To assure that these drugs do not cause any adverse “off-target” effects.
- To bring about a healthy enhancement in the academic .

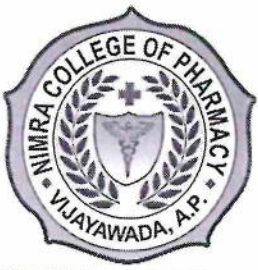

Conclusion : A one week FDP concluded on 17-04-2021 with plenty of learning & experience for the participants who were faculties from different institutions across the Andhra pradesh.

Total no of participants: 27

About the Topic

Pharmacovigilance is the science and activities related to the detection, assessment, understanding, and prevention of adverse effects or any other drug-related problems. The global pharmacovigilance approach involves coordinated efforts by regulatory authorities, healthcare providers, and pharmaceutical companies to ensure the safety and efficacy of drugs. Here are some of the key approaches to pharmacovigilance
Adverse event reporting: Healthcare providers and patients are encouraged to report any adverse events or side effects associated with drugs to regulatory authorities. This information is used to identify and investigate potential safety concerns.

Risk management plans: Risk management plans are developed by pharmaceutical companies to identify and manage potential risks associated with drugs. These plans include strategies for monitoring drug safety, minimizing risks, and communicating safety information to healthcare providers and patients.
